Zoommeeting Leitungen der Topic Groups 19.5.2022, 8:30-9:15

FI, Markus Demleitner, BDA -, RDM, Monica Valencia-Schneider, UI, Pierre Schnizer, KD Dirk Lützenkirchen-Hecht, Katrin Link, Gast Angela Warkentin, SP, Martin Erdmann,

Web tools for collaborative work with documents

The git-based work on the Federated Infrastructures white-paper was introduced by Markus. It is useful for people who are well acquainted with Linux and repositories and want to master software projects together. It seems too complicated for a generally suitable document system that serves the exchange within and between topic groups and is capable of handling editorial processes. We will continue to see what fits and ask Helmholtz about their documentation systems.

Website ErUM-Data-Hub

In Angela's preview, the new ErUM-Data-Hub website was very positively evaluated by the people present, the soft-launch is planned for the end of May. The pages explain what ErUM, ErUM-Data, ErUM-Data-Hub, DIG-UM are, links the ErUM committees, shows previous and upcoming workshops and schools.

Infos

- The Prisma Trialogue on the new BMBF action plan ErUM-Transfer took place on 18.5.2022 with the participation of industry and science. Promoted is a cultural change in exchange, early involvement of industry in basic research at large-scale facilities. Contacts are established through "study-fair-conferences". Industry needs low-threshold application procedures and very short approval times.
- Workshop on teaching machine learning (interdisciplinary) https://teaching-ml.github.io/2022
- Science Year 2023 Universe: there should also be actions in the area of digitalization. DIG-UM is in contact with RDS and KAT about a potential proposal.

Next Meetings:

Next Meeting 2-June-2022, 8:30-9:30 **Digitization Board**
Next Meeting 16-Jun-2022, 8:30-9:30 **Topic Groups**
